

The background features a complex technical drawing composed of multiple overlapping hexagons and lines. A central vertical dashed line runs through the composition. Various geometric elements are scattered throughout, including small red circles, grey squares, and white circles, some of which are connected to the main lines by thin paths. The overall aesthetic is clean, precise, and technical.

# PRECISION, FULLY REALIZED

**CADIAN**

# What Makes **CADiAN** Different

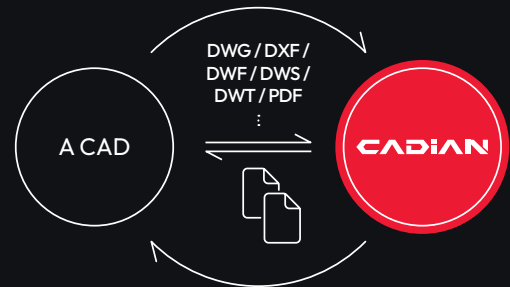

## Perpetual Ownership

No recurring subscription.  
Own your license forever with  
one-time investment.

## Business Continuity

Keep your stable design  
workflow with seamless  
compatibility.

## Scalability & Customization

Scale with CADian Professional,  
leveraging a wide range of expandable  
applications including AEC,  
Mechanical, and Electrical modules.

## Global Support, Local Care

Get global expertise and direct  
technical support—locally or straight  
from headquarters.

# Who We Are

## About Us

**CADian** has pioneered innovative CAD technology in Korea for over 35 years. We have consistently led the advancement of design and engineering industries, earning trust from professionals worldwide.

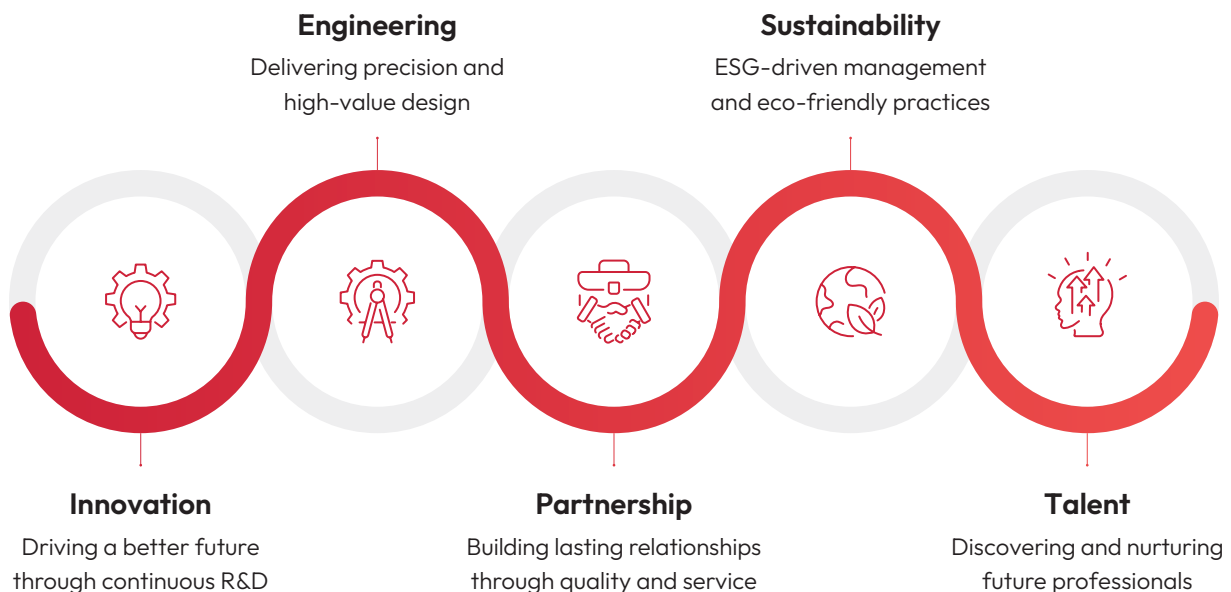

## Vision

Empowering global design standards beyond boundaries.

## Mission

Building an innovative design environment to deliver convenience for users and exceptional efficiency for enterprises & Accelerating next-gen CAD development and driving sustainable ESG growth, with AI and Cloud Technology.

# What is CADian

**CADian** is a professional 2D/3D CAD solution designed to streamline engineering and architectural workflows. By providing an intuitive UI with full DWG/DXF compatibility, CADian enables engineers to design with precision and efficiency.

---

## UX

(User Experience)

---

### Zero Learning Curve, Instant Productivity

#### Familiar Interface

Choose between a modern Ribbon UI or a Classic interface to match your workflow

---

#### Native Command System

Continue using the same commands, aliases, and hotkeys (no re-training required)

---

#### Customizable Workspace

Personalize your drafting environment - migrate your tool palettes and menu files

---

## Feature

---

### Smart Tools & High-Performance Engine

#### High-Speed Engine

Experience smoother file loading, Pan/Zoom in large-scale complex drawings

---

#### Smart Dimension

Instant multi-point dimensioning via intelligent geometry analysis

---

#### Hardware Efficiency

Optimized to run smoothly even on entry-level hardware

---

## Compatibility

---

### Keep Your DWG Ecosystem Intact

#### Universal File Support

Full bi-directional compatibility with DWG/DXF/DWF

---

#### Legacy Protection

Run your existing AutoLISP, VBA, and ADS applications without modifications

---

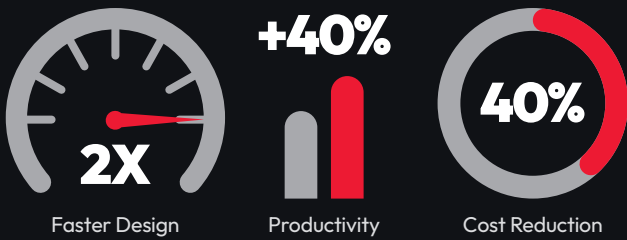

#### Seamless Collaboration

Seamlessly exchange files with your partners - on any CAD software

# Use Case

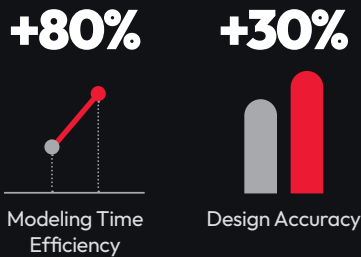

## CMES | AI Robotics Pioneer

Leveraging CADian Pro to accelerate design workflows and deliver intelligent solutions for logistics and manufacturing with greater efficiency and accuracy.

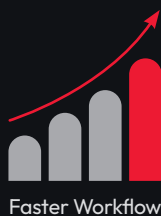

## Heritage Service | Cultural Assets

With AI & CAD tech integrated TWArch Pro, old hand-drawn images can be digitalized to CAD drawings through recognizing, analyzing components, and redesigned to 3D models, which facilitates data management and restoration.

## Korea's Leading Enterprises

Rely on CADian Pro to simplify complex design workflows and enable faster, more reliable collaboration across diverse industries.

# Our Product Line

## CADian Pro

Advanced 2D/3D CAD with over 400+ Lisp support, 3rd-party integration, and numerous productivity utilities

---

## CADian Classic

2D CAD equivalent to AutoCAD LT, supporting identical commands and full DWG compatibility with a perpetual license

---

## BIM Viewer

BIM viewer application optimized for BIM project team to view Revit (RVT/RFA) files quickly for inspection, decision-making and collaboration

---

## Dream

Civil CAD application for CADian Professional, providing profile/section drawing and civil-specific utilities

---

## TWArch

AI-based CAD solution to convert Hand-Drawn traditional wooden architecture drawings to Digital 2D/3D models

---

## AI-CE

AI-driven solution to generate BOM(Bill of Materials) and new drawings based on AI-recognized and inferred data from DWG or IMG files
